

PUBLIC NOTICE
VOLUNTARY REMEDIATION PROGRAM

In accordance with the Virginia Voluntary Remediation Program (VRP) public participation requirements of 9 VAC 20-160-120, the general public is hereby notified that the property located at 10300 Willard Way, Fairfax, Virginia 22030 (Courthouse Plaza Shopping Center) is requesting a Certificate of Satisfactory Completion of Remediation from Virginia Department of Environmental Quality (VADEQ) through the VRP. Voluntary site investigation activities performed by Apex Companies, LLC have identified volatile organic compounds (VOCs) in soil and groundwater at the site from former dry cleaning activities. Apex's site assessment activities included soil, soil gas, and groundwater testing and contaminant modeling, and risk assessment. The results of the VRP risk assessment has demonstrated that there is no unacceptable risk to human health or the environment at the subject property. Groundwater is not used on site or at neighboring properties, and there is no risks to off-site properties from the subject property. However, because VOCs in groundwater beneath the subject property exceed the drinking water standards, institutional controls will be in place to prevent future groundwater use on site. For more information on this matter, you may submit a written request to Mr. Peter M. Granholm, CIH, P.G. of Apex Companies, LLC, 15850 Crabbs Branch Way, Suite 200, Rockville, Maryland 20855. Written comments will be accepted for 30 days following the publication date of this notice.
